

# VRA: Support action for Vehicle and Road Automation network

Maxime Flament,  
ERTICO – ITS Europe  
[m.flament@mail.ertico.com](mailto:m.flament@mail.ertico.com)

This project is funded by  
the European Union

# VRA in Short

VRA – Vehicle and Road Automation is a support action funded by the European Union to create a collaboration network of experts and stakeholders working on deployment of automated vehicles and its related infrastructure

# Objectives of VRA Support Action

Create an active European network of experts on Vehicle and Road Automation and foster cooperation within the Automation WG

Identify deployment needs for Vehicle and Road Automation

**VRA-net.eu/wiki**

Contribute to EU-US-JPN trilateral WG on road vehicle automation (EC – US DoT – MLIT)

*Deployment paths, Regulatory issues, Testing, Connectivity, Evaluation of Benefits, Digital Infrastructure, Human Factors, Decision and Control Algorithms*

Promote the Research on Vehicle and Road Automation

# VRA Tools: Website, Wiki and Social media
